Brite Adds Intezer to Accelerate Threat Response and Eliminate Alert Fatigue

ROCHESTER, N.Y., Tuesday, January 20, 2026 – Brite, a Top Global 250 Managed Security Service Provider, is pleased to announce a new partnership with Intezer, the cybersecurity company behind the Forensic AI SOC.

This partnership enhances Brite’s managed cybersecurity services and improves security outcomes for customers. It involves integrating Intezer’s AI-powered Autonomous SOC platform directly into Brite’s Security Operations Center and its managed cybersecurity service, BriteProtect.

This integration enables Brite to investigate every security alert faster and more consistently, reduce alert noise, and deliver deeper, evidence-based investigations at scale. It also reinforces Brite’s AI-first cybersecurity strategy, combining expert-led managed services with intelligent automation.

Furthermore, Intezer adds a layer of Agentic AI playbook execution into its platform’s native machine-learned AI detection and alert correlation capabilities. The result is a more proactive, efficient, and scalable SOC that allows Brite to deliver enterprise-grade protection without adding headcount.

“Customers partner with Brite to operate their SOC and protect their business,” said Jon-Michael Lacek, Chief Technology Officer at Brite. “This integration aligns with our continuous improvement strategy. By eliminating low fidelity alert fatigue through AI-driven triage, our team can respond more quickly, investigate more deeply, and deliver better security outcomes for the organizations that trust us with their cybersecurity.”

Intezer’s AI SOC Platform delivers 24/7 automated alert triage, investigation and response across endpoint, SIEM, and phishing pipelines. Every alert is triaged in less than two minutes, with only about 4 percent of alerts escalated to human analysts. The platform delivers 98 percent verdict

accuracy and automatically closes up to 97 percent of false positives, dramatically reducing noise while ensuring no incidents are overlooked.

Itai Tevet, Intezer CEO, said, “Brite is setting a strong example of how managed security service providers can use AI to elevate service quality. Together, we’re enabling Brite’s SOC to investigate every alert, respond faster, and scale managed security operations with confidence.”

About Brite

Brite, a Sole Source Capital LLC company, is a trusted partner delivering integrated and scalable technology solutions that power safer, smarter, and more secure organizations and communities. Headquartered in upstate New York, Brite has satellite branches nationwide. Originally founded in 1983, Brite expertly leverages industry-leading technologies and solutions within IT services, cybersecurity, and public safety technology. For more information, please visit www.brite.com.

About Intezer

Intezer Forensic AI SOC is an AI-driven platform designed for enterprise-scale, forensic-grade alert triage and investigation. By combining human-like analytical reasoning with deterministic forensic techniques, it enables security teams to investigate every alert, expose advanced threats, and close gaps commonly missed by MDRs and other AI SOC tools. Enterprises including NVIDIA, MGM Resorts, Equifax, Salesforce, and Ferguson rely on Intezer to eliminate alert fatigue, strengthen detection, and confidently scale SOC operations in the AI era.
